PROFILE

Computer Science and Engineering student with a strong interest in technology, digital marketing, content creation, and creative design. Skilled in communication, teamwork, problem-solving, and multimedia tools. A motivated and adaptable person who enjoys learning new skills, taking on challenges, and gaining practical experience.

EDUCATION

Bachelor of Engineering - Computer Science and Engineering

PA College of Engineering Mangaluru
Visvesvaraya Technological University (VTU)
2024 - Present
Current CGPA - 7.7

SKILL

- Technical Skills: IoT System Development (ESP32/Arduino), Embedded C/C++, Python, Basic Web Development, and Sensor Integration.
- Tools & Software: Arduino IDE, VS Code, Git, Canva, Video Editing (CapCut/Premiere Pro), and MS Office.
- Soft Skills: Project Leadership, Problem-Solving, Team Collaboration, Effective Communication, and Critical Thinking.

PROJECTS

Weather station monitoring System

Role : Team Member | **Timeline :** 2026

- Real-time Monitoring: Measures temperature, humidity, and atmospheric pressure using sensors.
- IoT Connectivity: ESP32 collects the sensor data and sends it to an online platform.
- Remote Access: Weather data can be monitored remotely through the internet.

School Bus Tracker

Role : Team Leader | **Timeline :** 2026

- Real-Time GPS Tracking: Tracks live bus location, route progress, and vehicle speed using IoT-enabled GPS modules.
- Instant Notifications: Sends real-time alerts to parents and administrators regarding bus arrival, departure, delays, or emergency SOS.
- Route & Safety Monitoring: Ensures driver accountability, detects speed violations, and optimizes routes for student safety
- Project Leadership: Led the end-to-end development of the school bus tracking system, coordinating team tasks, hardware-software integration, and system testing.
